Deepraj Bhosale

WebDev | GameDev | Photographer

Hello, My Name is Deepraj Bhosale. I have immersed myself in Photography for at least 4 years now. I'm mainly into Event based Photography but i have focused on Candid and Creative Photography as well. As most photographers i started out with just my phone, learning to take photos. The phone i started out with had an 'Pro-mode' which let you freely choose the 'ISO', 'Shutter Speed', 'Focus', 'White Balance' etc. I was fascinated to the manual approach of taking photos and invested a lot of time learning and experimenting with it. Aside from photography, I'm interested in coding and game development. Basic Level in Godot, looking to expand more on it.

Projects

Baby&Me

Through this project we aim to solve 3 major problems faced by breastfeeding women: What We Aim To Achieve: To provide necessary infrastructure which are private, safe and clean, for mothers to breastfeed their infants in public places. To increase awareness with regards to donation of breastmilk and it's subsequent use as donated breast milk for little ones. To aid in donation of breastmilk to Comprehensive Lactation Management Centres with the help of National Health Mission guidelines.

The screenshot shows the homepage of the Baby&Me website. It features a large illustration of a woman breastfeeding, set against a background of green leaves and hearts. The text "Welcome to Baby&Me!" is prominently displayed. Below it, there are three cards: "Why Baby&Me?", "What does Baby&Me do?", and another "Why Baby&Me?" card. Each card contains a small image and a brief description. The "Why Baby&Me?" cards mention mortality rate prevention, orphanges, and safe breastfeeding areas. The "What does Baby&Me do?" cards mention finding nearest breastfeeding rooms, donating to lactation centres, and availability of donor milk.

SolCarry

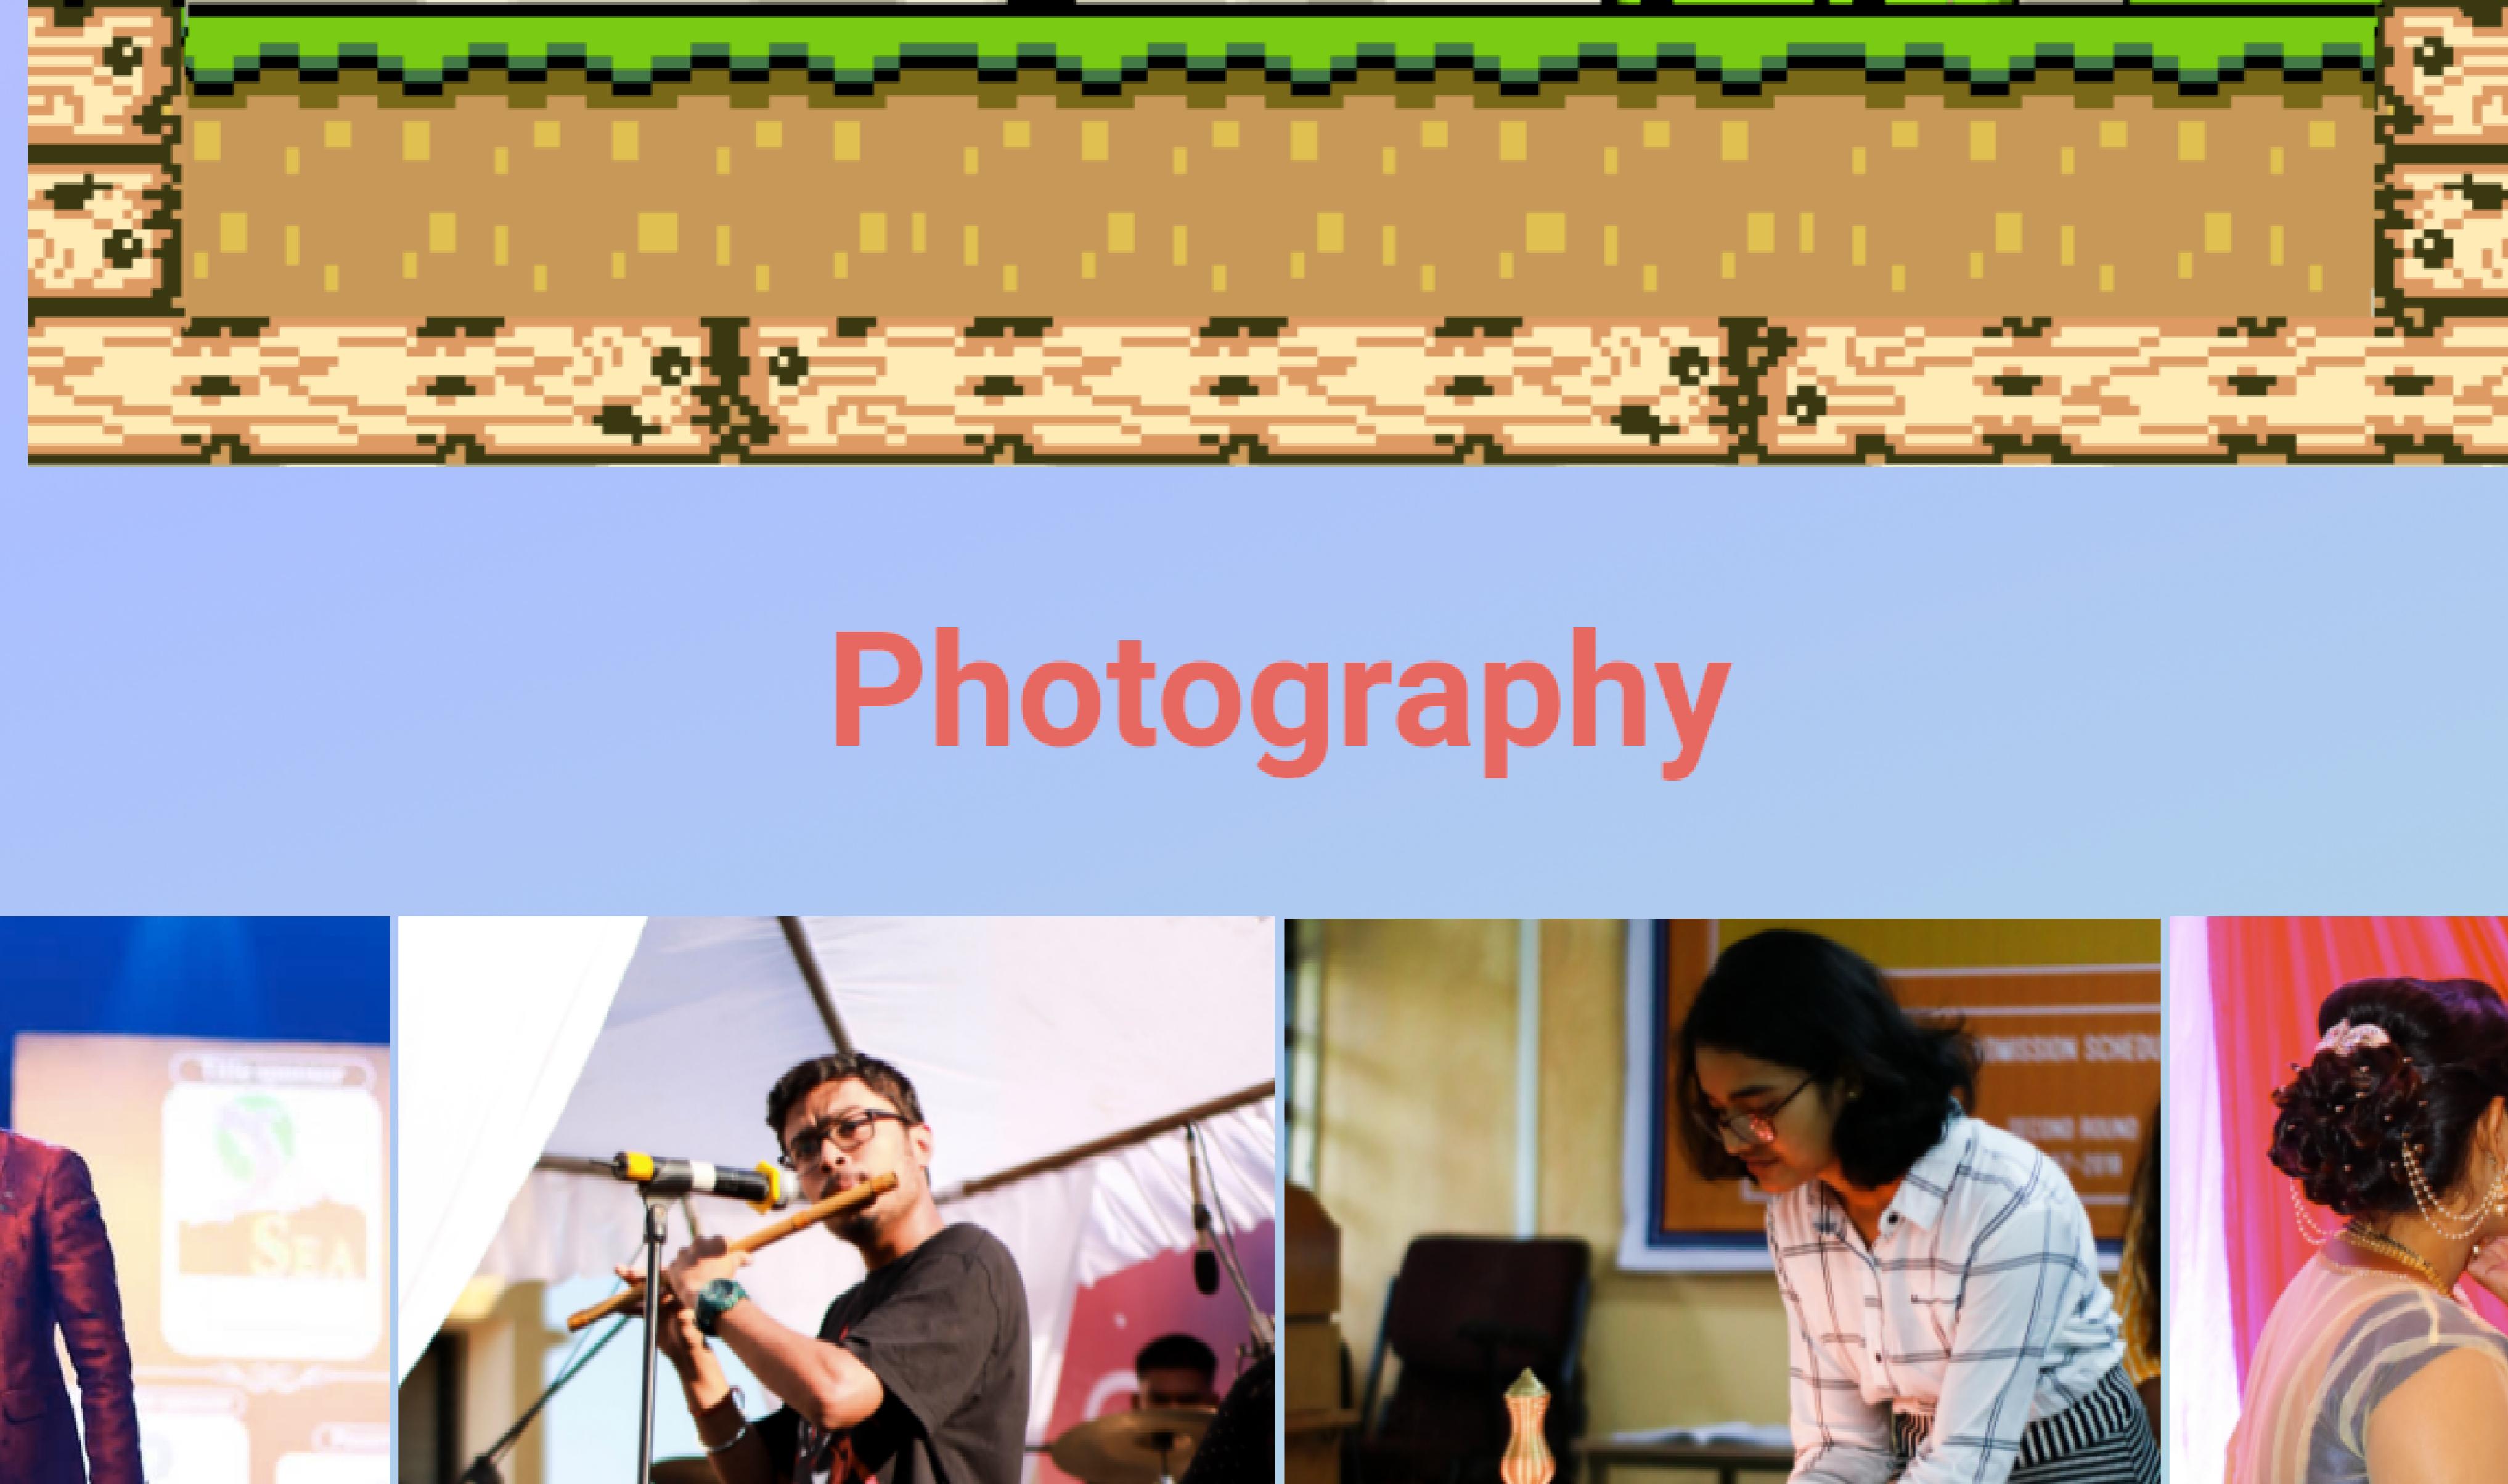

Solcarry, helps new and existing business to bridge the gap between them and the people stuck at home, by providing a platform to buy and sell. #Vocal_for_Local

The screenshot shows the homepage of the SolCarry website. At the top, there is a search bar with the placeholder "Search for Restaurant in North Goa". Below the search bar are three cards representing different restaurants: "Bay15" (Continental, Goan, Italian, Thai, North Indian, Desserts), "Tataki - Immersive Asian Dining" (Bar, Asian, Japanese), and "AJ's" (Fast Food, Continental, American, Italian, Burger). The SolCarry logo is prominently displayed in the center.

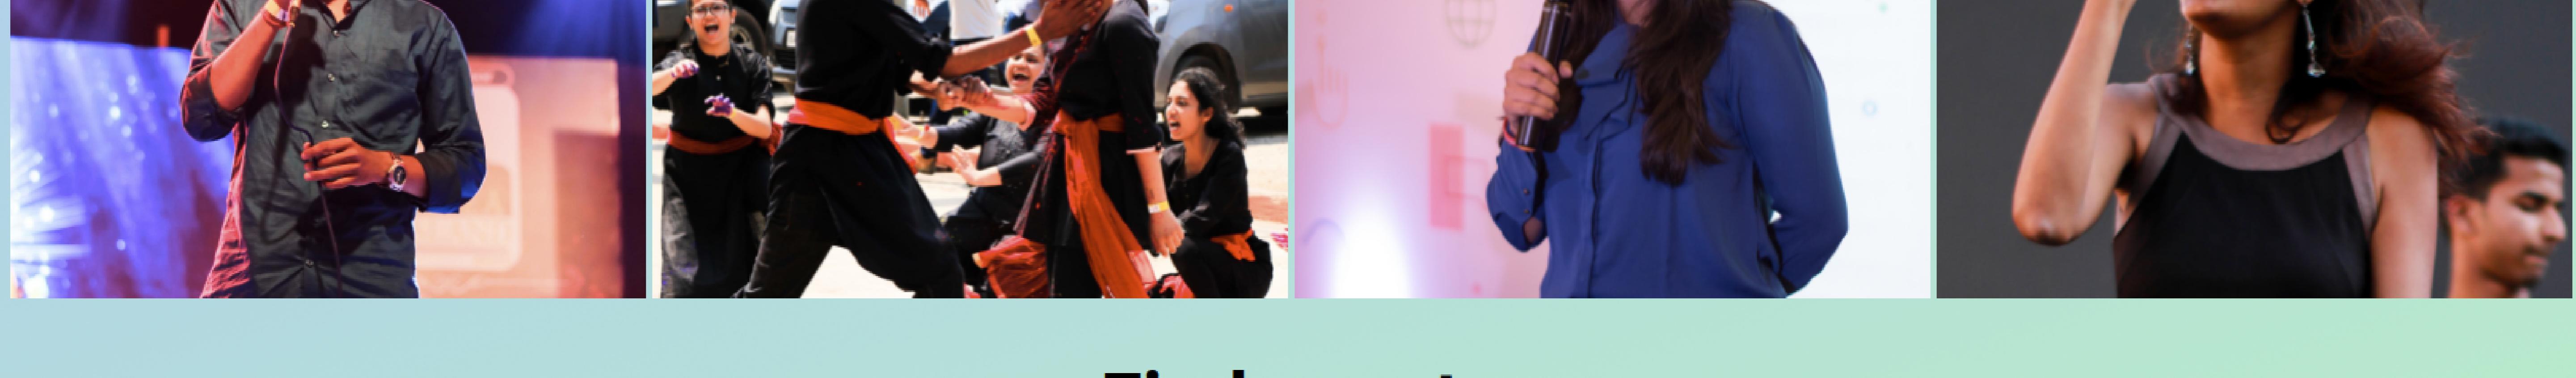

GameDev

Super Luigi World

Super Luigi World is a 2D side-scrolling platform video game developed using Godot.
