Experiment: 2

Aim: Create a simple Portfolio using HTML.

Theory:

HTML (Hypertext Markup Language)
The versions of HTML represent standardized improvements to the foundational language for the World Wide Web. As new technologies are developed and more efficient methods to achieve desired web page results evolve, developers and administrators settle on accepted language standards and then designate them using numbers to bring order and uniformity to the web.

HTML Tags used:

font tag:
The <font> tag plays an important role in the web page to create an attractive and readable web page. The font tag is used to change the color, size, and style of a text. The base font tag is used to set all the text to the same size, color and face.
The HTML <font> size Attribute is used to specify the size of text which is present inside <font> element.
The HTML <font> face Attribute is used to specify the font family of the text inside <font> element.
The HTML <font> color Attribute is used to specify the text color inside the <font> element.

Output:

Portfolio

## Deepraj Bhosale

WebDev | GameDev | Photographer

Hello, My Name is Deepraj Bhosale. I have immersed myself in Photography for at least 4 years now. I'm mainly into Event based Photography but i have focused on Candid and Creative Photography as well. As most photographers i started out with just my phone, learning to take photos. The phone i started out with had an 'Pro-mode' which let you freely choose the 'ISO', 'Shutter Speed', 'Focus', 'White Balance' etc. I was fascinated to the manual approach of taking photos and invested a lot of time learning and experimenting with it. Aside from photography, I'm interested in coding and game development. Basic Level in Godot, looking to expand more on it.
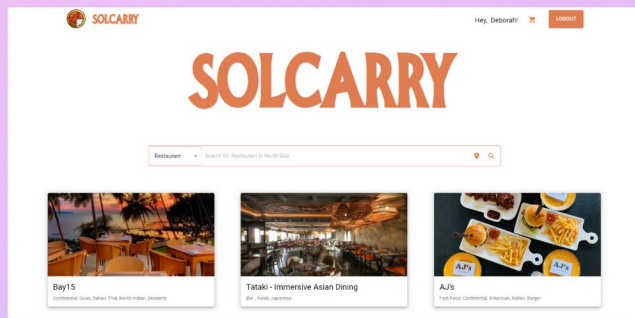

Projects

WebDev

Baby&Me

Through this project we aim to solve 3 major problems faced by breastfeeding women: What We Aim To Achieve: To provide necessary infrastructure which are private, safe and clean, for mothers to breastfeed their infants in public places. To increase awareness with regards to donation of breastmilk and it's subsequent use as donated breast milk for little ones. To aid in donation of breastmilk to Comprehensive Lactation Management Centres with the help of National Health Mission guidelines.

SolCarry

Solcarry, helps new and existing business to bridge the gap between them and the people stuck at home, buy providing a platform to buy and sell. #Vocal_for_Local

GameDev

Super Luigi World

Super Luigi World is a 2D side-scrolling platform video game developed using Godot.
